

Please absolutely pass on that burning instruction to end consumer to avoid any inconvenience.

burning instruction

With the purchase of this candle, you acquired a quality product. Only the best raw materials are selected and used by our company. In order that you can enjoy your candlelight, please follow these burning instructions:

1. a burning candle is an “unshielded fire” and therefore never leave it unattended!!
2. don't put burning candles next to each other or on top of each other
3. any broken pieces of wick or debris should be removed from the wax pool
4. keep drafts, protect the flame against drafts, drafts cause sooting, dripping or one – sided burning.
5. if the candle smokes visibly, cut the wick during burning carefully, if necessary, extinguish the candle.
6. in case of one-sided burning, bend the wick carefully aside, never bend or break a solidified wick.
7. a candle's edge that is too high must be cut in warm condition
8. burn the candle until the wax is melt to a pool on the candle's head
9. for extinguishing please dip the wick into the liquid waxpool and reset it up
10. burn this candle on a plate absolutely
